METHOD

We will weigh the boxes, obtain an airfreight quote and charge out what we get charged. Once payment has been received, we release goods to clear through our customs that include all required documents for customs in your country. EUR 1 and Form A is included for favourable duties.

Airfreight takes a few days. The customer **MUST** appoint a clearance broker at the airport closest to them to clear their goods. Our quote includes freight, insurance and paperwork to your destination. Goods not cleared promptly in your country attract storage fees.

AIRFREIGHT COST

The rule of thumb is the smaller the order, the higher the rate per kilo. It works to about 10% of the value of your order but goes down substantially with larger volumes. As mentioned, we pass on the cost directly. You are welcome to use your own Freight Forwarder.
